Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instant claims 1, 4-8, 11, 13, 15, 16, 18-20, 23, 25, and 26 are allowable over the prior art of record. Applicant has argued that the references of record fail to teach a composition as instantly claimed wherein the styrene or styrene derivative component is present in an amount of 0.1 to 30% by weight. Upon reconsideration of the references, the rejections of record have been withdrawn for reasons argued by applicant with respect to the amount of the styrene/styrene derivative component in the binder. With respect to the examples of the specification pointed to by the applicant, the examiner finds them to be persuasive. Initially, the examples did not appear to be persuasive as there is no direct comparison between samples wherein the components are present in the exact same amounts, however, but comparing the inventive samples, and how little effect the different amounts of components C and D had on the samples, it was determined that the inventive samples do demonstrate improved results mainly in sludge volume and resolution. Therefore, the rejections made in the previous office action have been withdrawn and the claims are now allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda C. Walke whose telephone number is 571-272-1337. The examiner can normally be reached on M-R 5:30-4.
